CURRICULUM VITAE

NGUYEN VO YEN LINH

Information

- Full name: Nguyen Vo Yen Linh
- Phone number: +84 395245029
- Email: nvyenlinh05@gmail.com
- Portfolio: https://yenlinh2905.github.io/
- Address: Ho Chi Minh City, Vietnam

Career Objective

Graduated in Information Systems with hands-on experience in frontend development using ReactJS/Next.js and familiarity with Node.js, MySQL, RESTful APIs, Git, and Agile workflows. Passionate about technology products and user experience, and aspiring to build a career in Product Management through Zalo's Product Management Trainee 2026 program.

Skills

Product & Analytical Skills:

- Product thinking & feature planning
- User flow analysis & workflow optimization
- Requirement gathering & problem-solving
- Dashboard thinking & data visualization
- Cross-functional collaboration
- Agile/Scrum workflow

Technical Skills:

- ReactJS, Next.js, JavaScript (ES6+)
- Node.js, RESTful APIs
- PostgreSQL/PostGIS, MySQL
- Git/GitHub, Jira, Docker, Postman, Figma

Soft Skills:

- Communication & teamwork
- Adaptability & proactive learning
- Analytical thinking & attention to detail
- User-focused mindset
- English: Intermediate working proficiency

Education

Bachelor of Information Systems Engineer – Nong Lam University, Ho Chi Minh City

- GPA: 3.59/4.0 | Top 5 in program
- Merit-Based Scholarship (2022 – 2024, 2 consecutive years)

Certifications & Achievements

Professional React Developer Certification - FPT Software Academy (2024) - View Certificate

Web Design Technician Certification - Computer Science Center, VNU-HCM (2024) - View Certificate

Professional Experience

Fullstack Developer – Institute Of Coastal And Offshore Engineering (ICOE)

December 2025 – Present

- Developed WebGIS platforms and information systems supporting environmental monitoring and operational management workflows.
- Designed interactive map-based interfaces and realtime dashboards to improve data accessibility and monitoring efficiency.
- Collaborated with stakeholders to implement features for realtime environmental data visualization and user interaction workflows.
- Processed large-scale datasets and optimized frontend performance to improve usability and system responsiveness.

Intern Frontend Developer – GoGoX Viet Nam

March 2025 – November 2025

- Contributed to the end-to-end development of GoGoX KR Logistics web applications in an Agile Scrum environment, supporting both B2C and B2B platforms.
- Developed responsive user interfaces using ReactJS/Next.js, including public-facing order tracking and detail features, while improving UI performance and reducing load time by approximately 20%.
- Collaborated with project managers, developers, and designers to deliver product features aligned with business and user requirements.
- Participated in feature implementation, debugging, testing, and documentation to improve system stability and user experience consistency.
- Designed responsive layouts and interactive workflows based on Figma designs, ensuring alignment with UX standards and brand guidelines.

Projects

Graduation Thesis – WebGIS System for Salinity Intrusion Monitoring in Ho Chi Minh City

January 2025 – June 2025

- Developed a WebGIS platform supporting visualization and analysis of salinity intrusion data for environmental monitoring in Ho Chi Minh City.
- Analyzed monitoring requirements and designed user workflows including map interaction, filtering, search, authentication, and realtime visualization.
- Proposed dashboard interaction flows and visual components to improve monitoring efficiency and support operational decision-making.
- Optimized system performance for handling large-scale spatial datasets and realtime environmental records.
- Deployed the system using Docker to improve scalability and reproducibility across development environments.

Live Demo: https://xamnhapman.opengis.vn/
Project Link: Backend Repo (GitHub) | Frontend Repo (GitHub)
Technical stack: ReactJS, HTML5, CSS3, JavaScript (ES6+), Node.js, REST API, Bootstrap, PostgreSQL/PostGIS, Redis, JWT Auth, Docker, Git.
